

*Hi Everyone, this is Enrique Muñoz from Centro de **Comunidad y Justicia**. We too have distributed and continue to provide Personal protective equipment to the immigrant community many who are our immigrant clients, we are also proactively providing information about resources that are available and “safe” for undocumented families to access without negatively impacting their ability to continue their legalization process.*

Here are our resources:

Legal Services- *We continue to provide low cost immigrant legal services through our attorney Joseph Zavaletta and two legal assistants Nayeli Macías and Juanita González. We are taking new clients through call and video conferencing and submitting family petitions despite the presidents push back, we want to be prepared for when the US embassies abroad reopen. We encourage people to call our office if they have questions. As well as encouraging DACA recipients to continue to Renew their Employment authorization, letting our communities know not to let it expire.*

HIV/ HEP C Testing- *We continue to work close with eth LGBTQ + Community to provide HIV and HEP C testing for our diverse communities in Idaho.*

Medicaid/ Public Charge- *We are providing reliable information regarding the Medicaid and how it relates to the Public Charge so that the Latinx Community can make an informed decision about keeping themselves especially children on this health program as well as other assistance programs.*

Medicaid Expansion- *We are currently collecting any stories form anyone from the community regarding how they are dealing with the COVID-19 outbreak and how it has affected their families. We want to share these stories and experiences with policy makers so that they can take steps to acknowledge the disparity in positive cases in our Latinx Communities and take steps in providing us with support.*
